PROFILE

Web Development and Database Administration student at Bahir Dar Polytechnic College, building practical skills in JavaScript, Python, PHP and MySQL. Experienced in customer-facing work while studying full-time, with hands-on IoT and AI-assisted content projects. Preparing to make a first open-source contribution through Outreachy and looking for opportunities to grow internationally as a software engineer.

EDUCATION

Bahir Dar Polytechnic College — Web Development & Database Administration (Diploma)
Bahir Dar, Ethiopia · Current

EXPERIENCE

Palm Palace Hotel — Front Desk Attendant
Bahir Dar, Ethiopia · Part-time, ~49 hrs/week

- Greet and check in guests, handling reception duties at the front desk.
- Take and coordinate in-room service orders, working across departments under time pressure.
- Balance a full-time study schedule with consistent, reliable part-time work.

PROJECTS

- Smart Agricultural IoT System**
- Designed a simulated environmental-monitoring setup for small farms using automated tracking and sensor data.
- Startup Prototypes**
- Built early-stage prototypes during tech training programs, taking ideas from concept to working demo.
- AI-Assisted Content Production**
- Use generative AI tools to produce digital content, video concepts, poster designs and AI-generated music.

SKILLS

Languages: JavaScript · Python · PHP · C++ · Java
Databases: MySQL
Web: HTML · CSS
Tools: Git & GitHub · Generative AI tools

OPEN SOURCE & GOALS

- Applying to the Outreachy December 2026 cohort, preparing a first contribution to the Wikimedia community.
- Seeking international tech opportunities, exchange programs, and hackathons to represent Ethiopia in global competitions.
